

November 15, 2023

Dear Jett Foundation Community,

Astellas would like to share study results of ASP0367 (MA-0211) in Pediatric Male patients with Duchenne Muscular Dystrophy (0367-CL-0102). The results of this study can be found on [Astellas clinical trials for NCT04184882](#). Please refer to the following documents archived in 'Study documents'.

- ✧ Scientific Results Summary
- ✧ Plain Language Summary

On behalf of all of us at Astellas, we would like to express our sincere appreciation for all the individuals, families, medical professionals and patient organizations who advance our rare disease research. We look forward to continuing to work with patients and families to develop new therapies for patients.

If you have any questions, please contact the study site or the Astellas team by email ([astellas.registration@astellas.com](mailto:astellas.registration@astellas.com)) or phone (800-888-7704). Please reference study 0367-CL-0102 when contacting Astellas. You can also visit [ClinicalTrials.gov](https://ClinicalTrials.gov) for [NCT04184882](#) to get more information on this study.

Sincerely,

Astellas Study Team
